

Steamer "OAKLEY L. ALEXANDER"

12 JUL 1949

This vessel is classed for unrestricted service but the spare propeller, required by the Rules to be carried on board, is stored ashore.

Enquiry was made of the New York Office on this point, and it is now learned that the vessel is engaged on coastwise service. In these circumstances, the certificate of class should be endorsed:- "Machinery spares for short voyages only", and it is submitted the necessary amendments be made accordingly.

Note for S.R.L.

Machinery spares for short voyages only supplied.
