ract from Southampton Classing Letter dated 18.6.54.

95 "PATHFINDER". Assignment of class in this case is being withheld pending receipt of a report of the satisfactory condition of the ship on arrival at her port of destination.
In the meantime I shall be glad if you will state particulars of the size and type of safety valves fitted on the main boiler and confirm that the safety valves are fitted with easing gear.
I shall be glad if you will also forward certificates in respect of the bronze propeller, as these do not appear to have been received in this Office.
