

Steamer "SANTA IRENE".

The deep tanks were also examined on this day and found to be in a condition similar to the Fore Peak tank.

The vessel was again attended on Tuesday, 6th June, 1961, when no further tanks had been opened for survey and the Owners' Representative was again reminded that this was a requirement for postponement of Special Survey.

Prior to the Santa Irene's sailing on Wednesday, 7th June, the remaining tanks were opened out but found to be in a similar condition to the tanks previously examined, neither drained nor cleaned.

At the time of survey the Owners' Representative agreed that the items as far as now seen could not justifiably be credited towards the Special Survey."

Yours faithfully,

Deputy Clerk to the
Classification Committee.
