"BALTYK"

Before this case receives consideration  
IT IS SUBMITTED the Surveyors be asked to  
state what means, if any, were employed to  
satisfy themselves that this is not a case  
of chemical embrittlement.

Please refer case to  
me before advising  
Surveyors.

Case discussed with Mr Taylor 14/7/55  
Apparently no investigation into  
possible chemical cracking was made  
other than visual examination.  
It appears the original written  
was not of a high standard
