Built at LENINGRAD

By whom built SEVERNEY S.B. YARD Yard No. 307

When built 1929

Owners SOVTORGFLOT

Port belonging to LENINGRAD

Electric Light Installation fitted by SEVERNEY S.B. YARD

Contract No. 307 When fitted 1929

Is the Vessel fitted for carrying Petroleum in bulk No

System of Distribution DOUBLE WIRE SYSTEM

Pressure of supply for Lighting 220 volts, Heating

✓ volts, Power 220 volts.

Direct or Alternating Current, Lighting DIRECT CURRENT

Power DIRECT CURRENT

If alternating current system, state frequency of periods per second ✓

Has the Automatic Governor been tested and found efficient when the whole load is suddenly thrown on or off YES

Generators, do they comply with the requirements regarding rating YES

, are they compound wound YES

are they over compounded 5 per cent. ✓

, if not compound wound state distance between each generator ✓

Where more than one generator is fitted are they arranged to run in parallel TWO 60 KW. MACHINES YES, is an adjustable regulating resistance fitted in series with each shunt field YES

Are all terminals accessible, clearly marked, and furnished with sockets YES

, are they so spaced or shielded that they cannot be accidentally earthed, short circuited, or touched YES

Are the lubricating arrangements of the generators as per Rule YES

Position of Generators ENGINE ROOM, EMERGENCY SET ON DECK

is the ventilation in way of the generators satisfactory YES

, are they clear of all inflammable material YES

if situated near unprotected woodwork or other combustible material, state distance of same horizontally from or vertically above the generators ✓

and ✓

, are the generators protected from mechanical injury and damage from water, steam or oil YES

are their axes of rotation fore and aft YES

Earthing, are the bedplates and frames of the generating plant efficiently earthed YES

are the prime movers and

their respective generators in metallic contact YES

Main Switch Boards, where placed ENGINE ROOM, EMERGENCY SWITCHBOARD IN DECK HOUSE.

If the generators and main switchboard are not placed in the same compartment, is each generator provided with a fuse on each insulated pole as near as possible to the terminals of the generator, additional to that provided on the main switchboard SAME COMPARTMENT

Switchboards, are they placed in accessible positions, free from inflammable gases and acid fumes YES

are they protected from mechanical injury and damage from water, steam or oil YES

, if situated near unprotected

woodwork or other combustible material, state distance of same horizontally from or vertically above the switchboards NONE and ✓

are they constructed wholly of durable, non-ignitable non-absorbent materials YES

, is all insulation of high dielectric strength and of

permanently high insulation resistance YES

, if semi-insulating material is used, are all conducting parts insulated from the slab

with mica or micanite or other non-hygroscopic insulating material, and the slab similarly insulated from its framework STEEL SWITCHBOARD, FITTINGS INSULATED WITH MICANITE

and is the frame effectively earthed YES

Are the fittings as per Rule regarding:— spacing or shielding of live parts

YES, accessibility of all parts YES

, absence of fuses on back of board YES

, proportion of omnibus

bars YES

, individual fuses to voltmeter, pilot or earth lamp YES

, connections of switches YES

Main Switchgear, description of switchgear for each generator and each outgoing circuit, and arrangement of equalizer switches EACH 60 KW GENERATOR HAS

TWO SINGLE POLE FUSES & DOUBLE POLE CIRCUIT BREAKERS WITH OVERLOAD & REVERSE CURRENT TRIPS, FOR EQUALIZING WHEN PARALLEL RUNNING A TRIPLE POLE SWITCH IS FITTED. AUX. GENERATOR HAS TWO SINGLE POLE FUSES & DOUBLE POLE SWITCH.

Instruments on main switchboard 3 ammeters 5 voltmeters ✓ synchronising device for paralleling purposes.

Earth Testing, state what means are provided at the main switchboard for indicating the state of the insulation of the system FRICHS SYSTEM

Switches, Circuit Breakers and ~~Fuse~~ Out-outs, do these comply with the requirements of the Rules NO. CIRCUIT BREAKERS & FUSES ARE SIMILAR TO THOSE FITTED ON "ALEXANDER RYKOFF" AND WERE APPROVED BY LONDON.

Joint Boxes Section and Distribution Boards, is the construction, protection, insulation, material, and position of these as per rule YES

Foundation

010766-010776-0143 12

Cables: Single, twin, concentric, or multicore *SINGLE & TWIN* are the cables insulated and protected as per Tables IV or V of the Rules *90% YES*
10% APPROVED 1944
Fall of Pressure, state maximum between bus bars and any point of the installation under maximum load *WINDLASS 67*

Cable Sockets and other connections, are the ends of all cables having a sectional area of 0.04 square inch and above provided with soldering sockets
YES

Paper Insulated Cables, If cables are paper covered, is the dielectric at the exposed ends of the conductor protected from moisture by being suitably sealed with insulating compound *✓*

Cable Runs, are the cables fixed as far as possible in accessible positions not exposed to drip or accumulation of water or oil, or to high temperature from boilers, steam pipes, uptakes or other hot objects, or to avoidable risk of mechanical damage *YES*

Support and Protection of Cables, state how the cables are supported and protected *METAL CLIPS, TUBES & SHEET IRON PLATING*

If cables are run in wood casings, are the casings and caps secured by screws *✓*, are the cap screws of brass *✓*, are the cables run in separate grooves *✓*. If armoured and lead covered cables are secured by metal clips, are the clips spaced as per Table VIII *YES*

Refrigerated Chambers, if lights are fitted, are the cables and fittings in accordance with the special requirements *NO LIGHTS IN CARGO CHAMBERS*

Joints in Cables, state if any, and how made, insulated, and protected *ALL POWER CABLES HAVE DIRECT LEADS, LIGHTING CABLES BY JUNCTION BOXES.*

Watertight Glands and Deck Tubes, are all cables passing through decks and watertight bulkheads provided with deck tubes or watertight glands
YES

Bushes in Beams and Non-watertight Partitions, where unarmoured cables pass through beams and non-watertight partitions, are the holes efficiently bushed *YES* state the material of which the bushes are made *BRASS OR LEAD*

Earthing Connections, state what earthing connections are fitted and their respective sectional areas *RADIO 100 Sq. in.*

, are their connections made as per Rule *YES*

Alternative Lighting, are the groups of lights in the propelling machinery space arranged as per Rule *YES*

Emergency Supply, state position and method of control of the emergency supply and how the generator is driven *THE EMERGENCY SUPPLY IS CONNECTED TO THE SUB-DISTRIBUTION BOARDS FOR EACH LIGHTING CIRCUIT, GENERATOR IS DRIVEN BY A PARAFFIN MOTOR.*

Navigation Lamps, are these separately wired *YES*, controlled by separate switch and separate fuses *YES*, are the fuses double pole *YES*

are the switches and fuses grouped in a position accessible only to the officers on watch *YES*

has each navigation lamp an automatic indicator as per Rule *YES*

Secondary Batteries, are they constructed and fitted as per Rule *RADIO ONLY*

Fittings, are all fittings on weather decks, in stokeholds and engine rooms and wherever exposed to drip or condensed moisture, watertight *YES*

are any fittings placed in spaces in which goods are liable to be stacked in close proximity to them; if so, how are they protected *NONE*

are any fittings placed in spaces where inflammable or explosive dust or gases are liable to be present, if so, how are they protected *NONE*

, how are the cables led *✓*

where are the controlling switches situated *✓*

Searchlight Lamps, No. of *TWO*, whether fixed or portable *FITTED ON BRIDGE*, are their fittings as per Rule *YES*

Arc Lamps, other than searchlight lamps, No. of *NONE*, are their live parts insulated from the frame or case *✓*, are their fittings as per Rule *✓*

Motors, are their working parts readily accessible *YES*, are the coils self-contained and readily removable for replacement *YES*

are the brushes, brush holders, terminals and lubricating arrangements as per Rule *YES*, are the motors placed in well-ventilated compartments in which inflammable gases cannot accumulate and clear of all inflammable material *YES*

are they protected from mechanical injury and damage from water, steam or oil *YES* are their axes of rotation fore and aft *NO*

if situated near unprotected woodwork or other combustible material, are the motors of the totally enclosed, pipe ventilated, forced draught, drip or flame proof type *✓*, if not of this type, state distance of the combustible material horizontally or vertically above the motors *✓* and *✓*

Control Gear and Resistances, are the generator field and motor speed regulators, starters and controllers constructed and fitted as per Rule *YES*

Lightning Conductors, where lightning conductors are required, are these fitted as per Rule *NONE STEEL MASTS FITTED*

Ships carrying Oil having a Flash Point less than 150° F. Have the special requirements of the Rules been complied with regarding switches, joint boxes, section and distribution boards, protection of cables, method of distribution, lead of cables, lights and fittings *✓*

If portable lamps for use in dangerous spaces are supplied, are they of a type approved by the Home Office *✓*

All Conductors are of annealed copper conforming to British Standard Specification No. 7.
The Insulated Conductors are guaranteed to withstand the immersion and resistance tests specified in the Rules.
The foregoing is a correct description.

G. Montorovich

Electrical Engineers.

Date *22. X. 29*

COMPASSES.

Distance between electric generators or motors and standard compass *50 FT.*

Distance between electric generators or motors and steering compass *45 FT.*

The nearest cables to the compasses are as follows:—

A cable carrying *25* Ampères *1.5* feet from standard compass *3.* feet from steering compass.

A cable carrying *2.0* Ampères *4.* feet from standard compass *2.* feet from steering compass.

A cable carrying *5* Ampères *3.* feet from standard compass *4.* feet from steering compass.

Have the compasses been adjusted with and without the electric installation at work at full power *YES*

Has the effect of switching on and off circuits, motors and other electro-magnetic apparatus within the vicinity of the compasses been noted *YES*

The maximum deviation due to electric currents was found to be *NIL* degrees on *✓* course in the case of the standard compass, and *✓* degrees on *✓* course in the case of the steering compass.

A. Speransky

Builder's Signature.

Date *19. XI. 29*

Is this installation a duplicate of a previous case *YES* If so, state name of vessel *M/S "FELIX DZERZINSKY"*

General Remarks (State quality of workmanship, opinions as to class, &c.)

This installation has been fitted on board the vessel under special survey, the workmanship generally was found to be very good. Both 60 Kw. machines have been examined under full load condition and governors found to be working satisfactorily, circuit breakers also examined and reverse current trips tried and found in working order. Both 30 Kw. & 10 Kw machines also examined under working condition and regulators found in order.

Clear. Light

16/12/29

Total Capacity of Generators *160* Kilowatts.

The amount of Fee £	:	:	When applied for,
			19.....
Travelling Expenses (if any) £	:	:	When received,
			19.....
