ANSD.....

Reference

Dear Sir,

With reference to the London letter of 27th January, regarding the First Entry reports on the M.V. "MARBURY", I have to state that the following particulars of the new propeller have been obtained from the Shipbuilders:-

Finished Weight 460 lbs.
 Rad. of gyration 1.25 ft.
 WK2 70 ft-lbs (without allowance ^{entrained} for entrapped water).
 Calculated moment of inertia 264 in-lbs.

I have also to state that, regarding the pumping arrangements, the Rule Requirements have been satisfied in all respects.

The plan of sterngear and screwshaft is Brunton's Drawing No.3/1858A of 9.4.47, and I am informed by Messrs. Crossley Bros. that this was submitted through our Manchester Office and approved by them in a letter dated 13.6.47.

Some overlooked certificates regarding this vessel are attached.

Yours faithfully,

C. W. Reed

The Secretary,

LIVERPOOL.

TRANSMITTED TO LONDON FOR
 THE CONSIDERATION OF THE COMMITTEE

A. W. Soar
 SECRETARY TO THE
 LIVERPOOL COMMITTEE
