Survey held at Köln-Deutz No. of visits 4 First date 11.4.58 Last date 20.6.58

FIRST ENTRY REPORT ON AUXILIARY INTERNAL COMBUSTION ENGINES

Name of Ship H.D. 2082 0479 *Chopin* Owners Ad. Strüver G.m.b.H., Hamburg
(Or Contract No. if name unknown) (Or Consignees) No. 26348-49 *Biologische Anstalt* 152

Ship Built at — by — when — Yard No. —
Auxiliary Engines or Gas Turbines made at Köln-Deutz by Klöckner-Humboldt-Deutz AG when 6.58 Eng. Nos. 2430330-35
Total No. of sets and description (including type name) one airless injection heavy oil V6M 536

INTERNAL COMBUSTION RECIPROCATING ENGINES. No. of cylinders per engine 6 Dia. of cylinders 270 mm Stroke 360 mm
2 or 4 stroke cycle 4 Maximum approved BHP 3.15 at 500 RPM Corresponding MIP 6.9 kg/cm² Maximum pressure 55 kg/cm²
Fuel Diesel Are cylinders arranged in Vee or other special formation? no If so, No. of
crankshafts per engine — Is engine of opposed piston type? no No. and type of mechanically driven scavenge pumps or blowers
per engine none No. of exhaust gas driven blowers or superchargers per engine none Is welded construction
used for: Bedplate? no Entablature? no Total internal volume of crankcase (if 20 cu. ft. or over) 1.5 m³ No. and total area of
crankcase explosion relief devices 3, area 285 cm² Are flame guards or traps fitted? yes Cooling medium for: Cylinders water
Pistons — No. of attached pumps: F.W. cooling — S.W. cooling — Lubricating oil one How is engine started? with air

SHAFTING. Is a damper or detuner fitted? no No. of main bearings 8 Are bearings of ball or roller type? no Distance between
inner edges of bearings in way of cranks 278 mm Crankshaft: Built, semi-built, solid Material of crankshaft Carbon Steel Approved
minimum tensile strength 55 kg/mm² Dia. of pins 165 mm Journals 165 mm Breadth of webs at mid throw 300 mm Axial
thickness 64.5 mm If shrunk, radial thickness around eyeholes — Dia. of flywheel 1000 mm Weight 1025 kg Are balance
weights fitted? no Total weight — Rad. of gyration — Dia. of flywheel shaft — water brake
Has each engine been tested in shop? yes How long at full power? 6 hours Was it tested with driven machinery attached? — Was the
governing tested and found satisfactory? yes Date of approval of torsional vibration characteristics (for engines of 150 BHP and over) 26.5.58
Date of approval of shafting 26.5.50 Identification marks on shafting LLOYD'S KLN. 1633 H.D. 27.3.58 417N
Particulars of driven machinery Generator

Port and No. of Certificate for Starting Air Receivers —

AUXILIARY GAS TURBINES. BHP per set — At — RPM of output shaft. Open or closed cycle? —
Arrangement of turbines. HP drives — at — RPM HP gas inlet temp. — pressure —
(A small diagram should be attached showing gas cycle) IP „ — at — „ IP „ „ „ „ „ „
LP „ — at — „ LP „ „ „ „ „ „
No. of air compressors per set — Centrifugal or axial flow type? — Material of turbine blades —
Material of compressor blades — No. of air coolers per set — No. of heat exchangers per set — How are
turbines started? — Are the turbines operated in conjunction with free piston gas generators? —
Total No. of free piston gas generators — Dia. of working pistons — Dia. of compressor pistons — No. of double strokes
per minute at full power — Gas delivery pressure — Gas delivery temperature —
Have the turbines and attached equipment been tested in shop? — How long at full power? — Were they tested with driven machinery
attached? — Particulars of gearing — Particulars of driven machinery —
Date of approval of plans — Identification marks —

ELECTRIC GENERATORS. Port and No. of Certificate for generators of 100 Kw. and over —
For generators under 100 Kw., has Makers' Certificate been obtained? — Are Certificates attached? —

The foregoing description is correct and the particulars are as approved for torsional vibration characteristics (strike out words not applicable)
Klöckner-Humboldt-Deutz
Aktiengesellschaft

Is this machinery duplicate of a previous case? no If so, which? —

GENERAL REMARKS. State if the machinery has been constructed under special survey in accordance with the Rules, approved plans and Secretary's letters.
State quality of materials and workmanship. Where existing machinery is submitted for classification the circumstances should be explained as fully as possible.

This engine has been constructed under special survey of tested materials and is in accordance with the Secretary's letters, approved plans and Rules Requirements. The materials and workmanship are good and the engine, when tested in the shops under full and overload conditions, was found to function satisfactorily. This engine, in my opinion, is suitable for installation in a vessel classed with this Society.

Engineer Surveyor to Lloyd's Register

Declaration to be signed by Surveyor at fitting-out Port:— The above described machinery has been fitted on board the
at — in a proper manner and found satisfactory when tested on the (date) — under full working conditions.
