

Tanker "ZANGUEZOUR."

EX "FORT WOOD."

The Classification Survey of this American built type T2R. tanker was completed on the hull in Baltimore, and the survey of the machinery which was partly held at that port is to be completed in France.

The items to complete the survey are as stated in endorsement dated 16.7.48.

In view of the importance of the electrical equipment of this type of vessel, it is considered that the Surveyor carrying out the survey should be joined by an Electrical Surveyor from this country. Further, as the machinery appears to be similar to that installed in the "Esso Bretagne", the 1st Entry Report of this vessel should be forwarded to Mr. Taxil in Paris for the use of the Surveyor in completing his survey and reports.

IT IS SUBMITTED Mr. Taxil be informed in accordance with the above and with regard to the visit of an Electrical Surveyors, Mr. Taxil should ascertain the dates when the vessel will be in France for the purposes of the survey so that arrangements can be made which will be equally convenient for the Owners and for this Office.
