

17th August, 1962.

SINGAPORE.

15767 "RUSA" - As recommended, further postponement of the Special Survey until September, 1962 having been approved. Please inform the Owners accordingly.

15773 "WING ON" - As recommended, except that class has been continued so far as the machinery is concerned subject only to main engine Nos. 1 and 2 cylinder covers (Metalocked 5.6l) being examined by March, 1963 and to the donkey boiler not being used until the Donkey Boiler Survey has been completed as previously recorded.

Where a Metalock repair has been examined twice over a period of two years and found satisfactory it may be deleted as a condition of class, and a suitable note inserted in the S.R.L. Appendix. In the circumstances therefore the condition of class relating to the port centre auxiliary engine bedplate has been deleted and the necessary note placed in the S.R.L. Appendix.

You should therefore issue an amended interim certificate, and forward a copy to this Office.
