OIL BARGE "Z6"
"SERVICE SHELL VI"

Certificate of Class

Dear Sirs,

We beg to acknowledge the receipt of your letter dated the 27th ultimo, together with the certificate of class of the Barge "SERVICE SHELL VI", which we have built for the Anglo Saxon Petroleum Co.

We agree to add a weight on the handle of the draincock at the O.F. service tank.

Regarding the valves which you require to be fitted at the discharge pipes at the ships side, we propose to fit a storm valve to the discharge pipe at the observation tank, on port side, the diameter of which is 50 mm.

The diameter, of the two other pipes being very small (30 mm. & 10 mm.) one on port side, the other on starboard side, it seems to us not necessary to fit a valve at same, and we hope that after having examined the plan N° 258, which we enclose herewith, in triplicate, you will agree our proposal.

We shall be glad to have a copy of the plan returned to us
