

LLOYD'S REGISTER OF SHIPPING,

48 Dalhousie Street,

Quebec, October 29th., 1943.

A.R. Riddell, Esq.,

Montreal, P.Q.

S.S. "CHIPPEWA PARK"
Montreal Report No. 5922.

Dear Sir:-

In reply to London Classing Letter of the 1st instant, we are able to confirm that, as in previous sister ships, a divisional bulkhead is fitted in the tween decks at frame 135.

It is also confirmed that the steam pipes are steel and that they were tested to 660 lbs. per sq.in. on 5th July 1943.

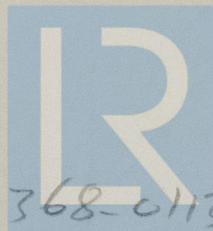

Trusting that this information will be found satisfactory.

Yours very truly,

(Sgd) A. HISLOP
