

6th May, 1958.

one

GOTHENBURG.

24033,40,47 - As recommended.

24007 "FERRIER" As recommended, except that the class has been continued subject to the corners of the midship deck house entrance doors being permanently repaired by completion of the Special Survey.

VASARA" 24011 As recommended.

23962 "MELINE" This ship has today been classed #100A1 "Carrying Petroleum in Bulk" together with the appropriate notations recommended by you. The machinery class has been made subject to larger size safety valves being fitted to the two steam/steam generators and satisfactory steam accumulation tests being held before the end of September, 1958.

I shall be glad if you will furnish a copy of the equipment numeral calculation for reference purposes as this is not shown on the plans forwarded.

RMC 24048 - As recommended.
