Dates of Survey { During progress of work in shops - Aug. 30, Sept. 6, 11, 13, 18, 20, 25, 27, Oct. 2, 4, 5. Are the approved plans of boiler and superheater forwarded herewith (If not state date of approval.)
while building { During erection on board-vessel - 18th. October 1944 to 15th. June 1945 Total No. of visits Continuous attendance

Is this Boiler a duplicate of a previous case Yes If so, state Vessel's name and Report S/S "ROCKWOOD PARK" Mtl. Rpt. N

GENERAL REMARKS (State quality of workmanship, opinions as to class, &c.) This BOILER has been constructed under Special Survey and in accordance with Approved Plans.

The shell longitudinal and circumferential seams are welded by the Union Melt Process and have been tested and X-rayed in accordance with the Rules for Class 1 Pressure Vessels.

The longitudinal seams of the front and back end plates are welded by the Union Melt Process.

The BOILER was tested hydrostatically at 350 lbs. per sq. in. pressure and found tight.

The above mentioned BOILER has been satisfactorily fitted on board this Vessel and examined under steam. The Safety valves have been adjusted under steam, tested for accumulation and thickness of washers noted.

In my opinion this Vessel is eligible for record L.M.C. 6-45.

Survey Fee 162 50 When applied for 30th July 1945
Travelling Expenses (if any) Included When received 19
