Tollbodgaten 27

Enclosure!

Oslo 31st August 1951.

RECEIVED

- 1 SEP 1951

Dear Sir,

Ansdr.....*11/9*

M.V. "SANTO".

In reply to yours of the 28th instant we return plan of the electrical installation herewith on which we indicate the alterations carried out in accordance with your letter of 11th November last.

On the old drawing a connection marked "Til Bat", meaning "to batteries", is shown; the batteries have now been dispensed with and the windlass takes its separate supply from the main board through fuses on each pole and a double pole linked switch.

The various indicating instruments were found to be protected by fuses on each pole as required, although not correctly shown on the drawing.

As regards the navigation lights, the switch formerly marked "Trådlös" has been utilised as the second means of supply to the navigation distribution board.

Yours faithfully,

THE SURVEYORS,

Per.

The Secretary,

London.
