

Lloyd's Register of Shipping

Tollbodgaten 27

Oslo, 21. april, 1951.

Dear Sir,

M.V. "SANTO".

In reply to your letter of the 30th March.

The first entry report is returned herewith, particulars of the materials of the vessel have been inserted as far as they could be ascertained.

The Overall length of the vessel is 123 ft. 4 ins.

Referring to the enumerated questions.

1. I have to state that an oil gland was not fitted as erroneously inserted in the report.

A thrower ring was fitted to the propeller shaft lying close up to the stern bush flange and the whole covered by a sand excluder bolted to the stern frame.

2. A revised plan of the electrical installation is in course of preparation by the Soon Slip og Verksted and will be forwarded on receipt.

3. It is confirmed that the MN is 173; it was omitted to take into account the larger M.I.P. of this engine.

Yours faithfully

E. Butler

The Secretary
London.
