

Motorship "GUANG MING".

Mr. Robert telephoned from Le Havre this morning, stating that this ship is at present being drydocked, but that as she must be undocked within 48 hours, there will not be time to lift the rudder with a view to the special examination of the LAMINEX bushes in accordance with the note in the S.R.L. Appendix. He therefore requested confirmation that this matter may be left until the next drydocking.

Mr. Bell subsequently confirmed that this would be in order, provided he is able to arrange for the erection of staging so that he can satisfy himself, as far as possible, with the continued efficiency of the bushes.

B. R. H.

3rd August 1966.
