Dear Sir,

Steamers "Gyllir" and "Guðmundur Júní".

I am in receipt of your letter of 2nd instant regarding the above vessels.

It is still under condiseration to convert "Guðm.Júní" to a diesel cargo vessel, but not decided jet.

As regards the "Gyllir" the Owher has in mind to sail her from Iceland to the continent loaded with scrap iron, one or even three voyages. She has been on slipway and the bottom was in order. The windlass, rudder and steering gear has been examined and are in order. The boiler has been examined internally, but overhaul of mountings not completed.

What is the Societies opinion regarding this matter, could she complete this voyages as classed ship, that is what the Owner would like to, if possible. An early answer would be appreciated.

Yours faithfully,

*Wigo R. Jessen.*
