Your Ref.

23rd March, 1971

Dear Sir,

South African Naval Vessel
"TAFELBERG" EX "ANNAM" 10,58

Discussions have been held recently at this office with senior representatives of the South African Navy and British Naval Constructor Mr. Peel, in connection with the re-classification of the above vessel.

It is evident from these discussions that the technical staff at Simonstown dockyard are anxious for a more experienced control in terms of survey requirements and repairs being effected under our supervision for this vessel which is virtually a merchant tanker.

Also, in respect of the Hydrographical vessel being built at Yarrows, namely the m.v. "PROTEA", they also express their intentions that this vessel should be retained in class once it has been handed over to the S.A. Navy.

These gentleman have been advised on general terms that as the m.v. "TAFELBERG" was built under survey, the requirements of a Special Survey would be required etc., corresponding to the age of the vessel and that provisional acceptance would be requested from Head Office.

We shall be pleased therefore for your instructions and in the meantime an official letter from the S.A. Navy is being drafted requesting this re-classification.

Yours faithfully,

T. F. H. Brebner
P. F. H. BREBNER

The Secretary,
LONDON
