

-6 JUN 1962

Rpt. 13.

No. ROU F.E. 38

REPORT ON ELECTRICAL EQUIPMENT.

(OTHER THAN FOR THE PROPULSION OF THE VESSEL)

Received at London Office

Date of writing Report 28.4. 1962 When handed in at Local Office 28.4. 1962 Port of ROUEN

No. in Survey held at Rouen Date, First Survey 7/9/61 Last Survey 13/2 1962
Reg. Book (No. of Visits 18)

41388 on the Single Screw Motor Vessel, "N O R W I D"

Tons { Gross.... 5562.
Net.... 2994.

Built at Grand Quevilly By whom built Chantiers de Normandie Yard No. 323 When built 1962

Owners Polish Ocean Lines Port belonging to Gdynia

Installation fitted by Chantiers Reunis Loire Normandie When fitted 1962

Is vessel equipped for carrying Petroleum in bulk No Is vessel equipped with D.F. Yes E.S.D. Yes Gy.C. Yes Sub.Sig.No Radar Yes

Plans, have they been submitted and approved Yes System of Distribution 3 Phase - 3 Wire AC Voltage of Lighting 220

Heating - Power - D.C. or A.C., Lighting 220 Power 380 If A.C. state frequency 50

Prime Movers, has the governing been found as per Rule when full load is thrown on and off Yes Are turbine emergency governors fitted with a trip switch Generators, are they compound wound, and level compounded under working conditions

Are the generators arranged to run in parallel Yes Is the compound winding connected to the negative or positive pole

Have machines 100 kw. and over been inspected by the Surveyors during manufacture and testing Yes Have certificates of test for machines under 100 kw. been supplied and the results found as per Rule Yes Position of Generators Engine Room (lower) starboard side

Is the ventilation in way of generators satisfactory Yes are they clear of inflammable material and protected from mechanical injury and damage from water, steam and oil Yes Switchboards, where are main switchboards placed Engine room, thwartship, forward, lower control platform

Are they in accessible positions, free from inflammable gases and acid fumes and protected from mechanical injury and damage from water, steam and oil Yes, what insulation is used for the panels Dead front, if of synthetic insulating material is it an Approved Type Yes, if of semi-insulating material (slate or marble) are all conducting parts insulated therefrom as per Rule Is the construction as per Rule, including locking of screws and nuts Yes Description of Main Switchgear for each generator and arrangement of equaliser switches Triple pole linked circuit breaker with over current trips, reverse power relays

and the switch and fuse gear (or circuit breakers) for each outgoing circuit. Triple pole linked circuit breaker with over current trips or switches and fuses

Are compartments containing switchboards composed of fire-resisting material or lined as per Rule Yes Instruments on main switchboard 17 ammeters 6 voltmeters 1 synchronising devices. For compound machines in parallel are the ammeters and reverse current protection devices connected on the pole opposite to the equaliser connection Earth Testing, state means provided lamps and insulation measuring device Preference Tripping, state if provided Yes, and tested Yes

Switches, Circuit Breakers and Fuses, are they as per Rule Yes, are the fuses an Approved Type Yes make of fuses Siemens or Hazemeier are all fuses labelled Yes If circuit breakers are provided for the generators, at what overload do they operate 125% 12 sec. and at what current do the reverse current protective devices operate 12% Cables, are they insulated and protected as per Rule Yes if otherwise than as per Rule are they of an Approved Type less than state maximum fall of pressure between bus bars and any point under maximum load 6% volts. Are all paper insulated and varnished cambric insulated cables sealed at the ends Yes

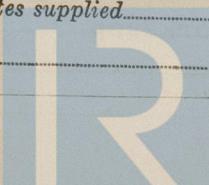

Are all the cable runs in accessible positions not exposed to drip or accumulation of water or oil, high temperatures or risk of mechanical damage Yes, are any cables laid under machines or floorplates No, if so, are they adequately protected State type of cables (if in conduit this should also be stated) in machinery spaces VR or VC LCA, galleys VR, VC, asbestos silicone and laundries VR LCA State how the cables are supported or protected Run on trays, screwed clips protected in holds

Are all lead sheaths, armouring and conduits effectually bonded and earthed Yes Are all cables passing through decks and watertight bulkheads provided with deck tubes or watertight glands Yes, where unarmoured cables pass through beams, etc., are the holes effectively bushed Yes Refrigerated chambers, are the cables and fittings as per Rule Yes

Have refrigeration fan motors been constructed under survey Not closed and test certificates supplied

Are the motors accessible for maintenance at all times

012616 - 012619 - 0054

Lloyd's Register Foundation

Alternative Lighting, are the groups of lights in the engine and boiler rooms arranged as per Rule YES Emergency Supply, state position
Navigating bridge
Navigation Lamps, are they separately wired YES controlled by separate double pole switches and fuses YES Are the switches and fuses in a position accessible only to the officers on watch YES Is an automatic indicator fitted YES Is an alternative supply provided YES
Secondary Batteries, are they constructed, fitted and adequately ventilated as per Rule YES state battery capacity in ampere hours 150 A.H. Where required to do so does it comply with 1948 International Convention
Lighting, is fluorescent lighting fitted YES If so, state nominal lamp voltage 220 and compartments where lamps are fitted
Machinery spaces, pantry, accomodation.
Fittings, are all fittings on weather decks, in stokeholds and engine rooms and wherever exposed to drip or condensed moisture, weatherproof YES
Searchlights, No. of 2, whether fixed or portable fixed, are they of the carbon arc or of the filament type filament
Heating and Cooking, is the general construction as per Rule YES, are the frames effectually earthed YES, are heaters in the accommodation of the convection type YES Motors, are all motors constructed and installed as per Rule and placed in well-ventilated compartments in which inflammable gases cannot accumulate and protected from damage from water, steam and oil YES
Are motors coupled to oil fuel transfer and pressure pumps capable of being stopped from a position accessible in the event of fire in the pump compartment YES Have motors of 100 BHP and over been inspected by the Surveyors during manufacture and testing YES
Have certificates of test for motors under 100 BHP intended for essential sea services been supplied and the results found as per Rule YES
Lightning Conductors, where required are they fitted as per Rule YES
Ships carrying Oil having a Flash Point of less than 150° F. Have all the special requirements of the Rules for such ships been complied with, are all fuses of an Approved Cartridge Type, make of fuse. Are the fittings for pump rooms, tween deck spaces, etc., in accordance with the special requirements for such ships. Are all cables lead covered as per Rule
E.S.D., if fitted state maker Atlas location of transmitter and receiver Double bottom ER 91-92
Spare Gear, if the vessel is for open sea service have spares been provided as per Rule and suitably stored in dry situations YES
Insulation Tests, has the insulation resistance of all circuits and apparatus been tested and found satisfactory YES

NOTE.—Use Rpt. 13 Continuation Sheet if the above space is insufficient.

The Electrical Equipment is installed in accordance with the approved plans and the requirements of the Rules.

All Insulated Conductors are guaranteed to have been tested at the maker's works as specified in the Rules.

The foregoing is a correct description of CHANTIERS RÉUNIS LOIRE-NORMANDIE

CHANTIER de NORMANDIE
GRAND-QUEVILLY (S.-M^{me})

Electrical Contractors. Date 10/5/1962

COMPASSES.

Have the compasses been adjusted under working conditions Yes

CHANTIER de NORMANDIE
GRAND-QUEVILLY (S.-M^{me})

Builder's Signature. Date 10/5/1962

Have the foregoing descriptions and schedules been verified and found correct Yes

Is this installation a duplicate of a previous case No If so, state name of vessel

Plans. Are approved plans forwarded herewith Yes If not, state date of approval

Certificates. Are certificates of test for motors engaged on essential sea services and generators forwarded herewith Yes

General Remarks. (State quality of workmanship and materials, opinions as to class, etc.) The electrical equipment of this vessel has been installed under Special Survey in accordance with the Rules, approved plans and Secretary's letters. The materials and workmanship are good, except that temperature rise tests held on the stators of the two 335 KW generators were a minimum of 48°C and not within the limits of the 1958 Rules. The Owners have meantime accepted these two generators which have been de-rated to 300 KW, and complies with the Rules requiring one generating set to act as a stand-by. The nameplates on both machines and the circuit breakers have been altered accordingly.

The Builders and Owners have made an agreement to replace the two stators mentioned above with new ones which meet the requirements of the Rules, not later than March 1963. Please see Secretary's letter to the Builders dated 6th April 1962.

(The Surveyors are requested not to write on or below the space for Committee Minute.)

Total Capacity of Generators 828 Kilowatts.

The amount of Fee ... NF 3585. When applied for,

GMD 19

When received,

Travelling Expenses (if any) NF 300. 19

Surveyor to Lloyd's Register of Shipping.
