

5th September, 1958.

NAGASAKI

1005 "KOTBI MARU" This ship has today been classed  
#100A1 "Carrying Vegetable Oil in Deep Tank Aft" together  
with the appropriate notations recommended by you.

It is concluded that the thicknesses of shell plating  
at ends of the ship are as shown on the plan and not as  
reported. Your attention is drawn to Circular Letter  
reference SHIP/21 dated 2nd February, 1958, and I would  
point out that the deck factor should be stated on the  
First Entry reports.
