GENERAL REMARKS

State if the machinery has been constructed and/or installed under special survey in accordance with the Rules, approved plans and Secretary's letters. State quality of materials and workmanship and give recommendations for classification, including any special notation to be assigned. Where existing machinery is submitted for classification the circumstances should be explained as fully as possible.

The machinery of this vessel has been constructed and installed under Special Survey and in accordance with the Rules, approved plans and Secretary's letters.

The material and workmanship are good.

The main and auxiliary machinery was examined under working conditions during sea trials at full power with satisfactory results and is eligible in our opinion for classification with records of L.M.C. 12.59, T.S.O.G., Oil Engine Machinery Aft.

Re London letter dated 19.6.59, no gear hammer or rough running was observed during sea trials.
