Principal Surveyor

NEW YORK

Dear Sir:

Herewith acknowledge receipt of your letter dated 1st instant, relative to a classing letter received from London for the above mentioned vessel.

Boiler Heating surface:

According to my notes the heating surface for each main boiler is as given hereunder:

Boiler	4200	square	feet
• Wall	108	"	"
Superheater	733	"	"
Economizers	1270	"	"

Total 6311 Square feet each boiler.

Respecting economizers these units remain in service, but are fitted with bypass lines for emergency purposes, when one or both economizers may be cut out of service.

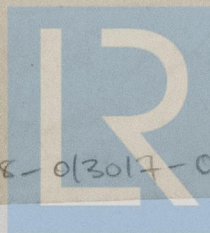

The inquiry as to adequate means for locking shut the suction valves of No. 4 deep tanks, cannot be verified at this time, but will be checked as soon as my notes at New York are available.

Yours very truly,

/s/ W.J. BLOOMFIELD

Surveyor
