$$\text{Allowance for Deck Erections} \quad - 8 \frac{1}{2}$$

Length	Length allowed.	Height.
Forecastle	29.3	27.92
Bridge House	11.0	11.00
† Raised Qr. Dk.	105.0	105.00
Poop		
Total	143.92	= .80

$$\text{Length of Ship} \quad 180.0$$

$$\text{Corresponding percentage (Para. 11, 12, 13, or 14)} \quad 70\%$$

FREEBOARD recommended amidships from centre of Disc to top of Statutory Deck Line, Wood (Steel) Deck:

Fresh Water Line	above centre of Disc
Indian Summer Line	" " "
Winter Line	below " "
Winter North Atlantic Line	" " "

If the frames, skin planking, or ceiling are of unusual thickness the breadth of vessel to inside of ceiling should be reported.
In vessels obtaining an allowance for deck erections under Para. 11 where the sheer drops shaft amidships the height of the R.Q.D. is to be taken from the level of the top of the amidships beam.
In flush-decked vessels the total standard mean sheer means the sheer measured at the stem and stern-post. In vessels having poops and forecastles, it means the sheer measured at points distant one-eighth of the vessel's length from stem and stern-post.

2m.727 T.

State dimensions of freezing port area on back of this form.
The Surveyor should state whether the fall in sheer as reported is measured relatively to the straight line of keel or to the water line. If measured relatively to water line the vessel's draft at time of survey, and also the usual load-draft forward amidships should be reported.

MARKING FORM

27 JUL 1934

RECEIVED

013057-013062-0266

Lloyd's Register Foundation

Do all the Frames extend to the top height in the Poop? ✓ Raised Quarter Deck? yes Bridge House? yes Forecastle? yes

To what height do the Reverse Frames extend? ✓

Has the Poop or Raised Quarter Deck an efficient Iron Bulkhead at the fore end? yes

Give particulars of the means for closing the openings in Bulkhead none

Is the Poop or Raised Quarter Deck connected with the Bridge House? yes

Has the Bridge House an efficient Bulkhead at the fore end? yes

Give particulars of the means for closing the openings in Bulkhead none

What is the thickness of the Bridge Front plating? .30 and Coaming plate? .30

Give scantlings and spacing of the Stiffeners $3 \times 3 \times 2 \frac{1}{2} \times \frac{5}{16}$ Z L spaced 27".

Are bracket plates fitted at each end of the Stiffeners? At top of stern and bottom of bottom.

Has the Bridge House an efficient Iron Bulkhead at the after end? yes

How are the openings closed? none

Is the Forecastle at least as high as the main or top-gallant rail? yes Has the Forecastle an efficient Iron or Wood Bulk'd. at after end? steel

Are the Engine and Boiler openings covered by a Bridge, Poop, Raised Quarter Deck, or enclosed by a Strong Iron or Steel Deckhouse? ~~Bridge house on R.Q.D.~~

If the openings are not so protected are the exposed parts of the Casings efficiently constructed? ✓

Give thickness of plating; scantlings and spacing of Stiffeners ✓

What is the height of the exposed Casings? 7' 0" Are suitable means provided for closing all openings in them in bad weather? yes

Are the Weather Deck Hatchways efficiently constructed and at least equal to the requirements of Section 28 of the Rules for 1904-5? Give particulars below: -

Position and Size.	NO 1 Fore	NO 2							
Item.	29-11" x 18'-0"	Rule.	40-6" x 18'-0"	Rule.

* FORE AND AFTERS.	Number	NIL	NIL						
Section and Scantlings									
Material									
HATCHES Thickness	3"	3"							
Remarks	WP	WP							

* The depth of Fore and Afters should be stated from the underside of the hatches in all cases.

(If the sill of the lowest side scuttle will be less than 6 inches above the Indian Summer Load Line if assigned under the tables, state vertical distance from top of deck at side amidships to lower edge of lowest side scuttle.)

The following information is to be given in all Cases of vessels dealt with under Paras. 11, 12 (under 15 feet Moulded depth) and under Shelter Deck Rules.

What is the thickness of the Bridge Sheerstrake? ✓ Strake between Main and Bridge Sheerstrakes? ✓

Delete the words { The Crew are not, berthed in the bridge house.
that do not apply { The arrangements to enable them to get backwards and forwards from their quarters are, satisfactory. ✓

Length of Bulwarks in well 35'-0" 34'-9"
