Dear Sir, Ans'd .....

"NIKKO MARU"

Kobe Report No. 6496

We acknowledge receipt of your letter dated 11th September in connection with the adjustment of the exhaust gas economiser safety valves on the above named vessel.

In reply we have to advise you that the safety were in fact adjusted to 13 kg/cm<sup>2</sup> as reported.

We would refer you to our letter to the Secretary dated 6th January, 1959 from which it will be noted the economiser was approved for a maximum working pressure of 13 kg/cm<sup>2</sup>.

The Owners requested that the safety be adjusted to this pressure in order to avoid leakage from these valves during normal working operation.

We await your confirmation that the setting pressure of 13 kg/cm<sup>2</sup> is in order.

Yours faithfully,

*G. Kajima*
