

JOSINA

Port - Gjn Rpt.No. 534

Before this case receives the consideration of the Committee it is submitted the Surveyors be requested to furnish a report form 8(A) listing items dealt with for G.E.

Their attention should be drawn to Instructions to Surveyors, Part 3a, 1963 regarding the items required for the G.E. bearing in mind the age of this ship and also amendment No.16, if applicable.

It is concluded full requirements of an annual Classification Survey as per Para. C101-103 of the 1967 Rules were complied with although this is not apparent from their entries "good in parts examined".

It is further concluded that the F.P. spaces were also examined but reported in error as "not examined". Their comments are invited.
