

L.S.T. "TROMSO" ex L.S.T.3006.

This vessel was built in 1944 to the class A-
"For Government Service".

The Ministry are trying to obtain a charterer
for the vessel and, if successful, reclassification for a
limited commercial service is desired.

Similar circumstances are attached to the "EMPIRE-
CELTIC", "BALTIC", "CEDRIC", "DORIC" and "GAELIC". ~~and~~ These
vessels are at present classed without the figure 1, and their
equipment is similar to the "TROMSO".

IT IS SUBMITTED the "TROMSO" also be classed
without the Figure 1 when the survey is completed, as in the
previous cases, provided 15 fathoms of $1\frac{1}{2}$ Tayco is supplied,
and the remainder of the cable is tested to Rule requirements.

JSY
10th September, 1952.
