Copy of a

~~Extract from~~ letter dated 12th June, 1914, received from .....

The Societys Surveyors at AMSTERDAM.

Original letter with .....

Vessel's Name "ARTEMIS".

With reference to your classing letter of the 9th instant respecting the First Entry report No.6072 on the Motor vessel "ARES", and with regard to the braking test of this vessel's steel wire, We beg to inform you that this is really 39 tons.

Respecting the strakes of plating in the Hull of this vessel it appears that one strake has erroneously been omitted in the First Entry Report of this vessel and also in the First Entry report No.5977 on the Sister Vessel "ARTEMIS".

We enclose herewith amended plating form for both vessels and should be glad to have same pasted over the First Entry reports.

We are, etc.
