We are obliged by your letter of the 31st ultimo and for the information that you have given us. On referring to our letter of the 19th December last we find that under (2) we enquired whether Owners work, if carried out independently of the collision repairs, would have required one day in drydock. In view of your letter under reply this would seem only to refer to the checking of the wear down of the screw shaft as it was the only classification item requested.

We regret troubling you once more and await your early reply.

Yours faithfully,
