

"VULCANIA"

The following apparent discrepancies are noticed when comparing this vessel with the sister ship "SATURNIA" :-

	VULCANIA -----	SATURNIA -----
Length	192.45	184.76
D.Tons	15369.81	11587.49

The length in each case is given on the first entry report as Italian method.

As regards the Under Deck Tonnage it would appear that in the case of the SATURNIA the tween deck tonnage between "D" and "E" decks was omitted.

Kindly state which tonnage should appear on the certificate and if the length given on the report is correct.

Bleg. Dr. Tri. 8/1/29.
