I have surveyed the above-named ship in accordance with the Rules for Advancement of CSH

Attended on board at the new owners request for the purpose of advancement of CSH.

The centre cargo tanks 3,5 & 8 were examined and were found heavily pitted on the bottom plating. It was stated that the previous owners had fitted corrosion anodes in these tanks when the vessel was in Rotterdam last October. A note should be placed in the Appendix that the bottom plating is heavily pitted in No.3,5 & 7 cargo tanks and that corrosion anodes have been fitted. (Anodes manufactured by F.A. Hughes, England)

I declare that the items detailed in this report (except as stated otherwise) comply with the requirements of the Merchant Shipping (Cargo Ship Construction and Survey) Rules 1965, applicable to this ship, and are in all respects satisfactory for the service on which the ship is intended to ply namely International voyages/voyages within the limits

(The above declaration applies only to sea-going cargo ships of 500 tons gross and above registered in the U.K.)

The items now surveyed are detailed on this report. All were found or placed in good condition unless otherwise stated. I recommend, therefore, that this ship remain as classed with/without fresh record of dry docking. but CSH (with date) upon completion subject to any outstanding condition that may be attached to the ships class remaining as previously recommended.

(Where conditions of class are recommended to be retained, imposed, amended or deleted, particulars must be stated above and on the Interim certificate.)
