Dear Sir:

"RAPHAEL SEMMES"

In reply to your letter of the 7th instant, the Owners of the above named vessel inform me that the safety valves of the port boiler were adjusted under steam by the American Bureau of Shipping and the U.S. Coast Guard, in October 1952, at Philadelphia, Pennsylvania. They are unable to explain why the Society's Surveyor was not also present at that time.

The vessel is now on coastal service calling at Philadelphia from time to time, and it has been suggested that the Surveyors at that port make their own arrangements through the Company's local office for completing this boiler survey in the near future.

The Philadelphia Surveyors are being advised by letter today.

Yours faithfully,

Surveyor
