Telegrams: Committee, London, Telex
Telex No.: 24305

Telephone: ROYal 9166

20th November, 1961.

Dear Sir,

Motorship "TORO"

C.
DHGK/AB

With reference to Leith First Entry Report No. 25047, it is noted that the safety valves of the water tube donkey boiler have been adjusted to 170 lbs. per sq. in., which is above the 3% allowed on the W.P. of 160 lbs., and the Surveyors' attention should be drawn to this matter.

I think it well to add that in view of the survey held last month at London, this ship has now been classed as "Oil Tanker" "FP above 150°F." "Thames River and Estuary Service".

Yours faithfully,

Deputy Clerk to the
Classification Committee.

The Secretary,
GLASGOW.
