25th March, 1931.

Dear Sirs,

E. With reference to your First Entry Machinery Report No. 7896 on the Twin Screw Motorship "CAMPOAMOR", I have to say it is concluded that the pitch of rivets in the longitudinal seams of the donkey boiler shell is 204.4 m/m as approved, not 185 m/m as reported, and that the main stays are 68 m/m in the body and not as reported, but I shall be glad to receive confirmation thereof in due course.

I am, Dear Sirs,

Yours faithfully,

Secretary.

The Surveyors,

BILBAO.
