 Particulars of Examination and Repairs (if any) *Docking*

(Periodical Surveys, when held, must be reported in detail and serially in the terms of the Rules. State clearly the cause of Repairs, if any, and, in detail, the nature and extent of Examinations and subsequent Repairs. Repairs on account of Damage (the cause of which must be stated) should be separated from Repairs due to other causes; and besides being detailed in the body of the report, should be briefly summarised at the end of the report. State also the dates and initials of any letters respecting this case.)

Did the Surveyor personally go inside each Main Boiler separately and make a thorough examination at this time?
 Do. " Donkey " " " " " " "

If this was not done, state for what reasons?
 And what parts of the Boilers could not be thus thoroughly examined?
 Also what special means, in the absence of internal examination, were adopted by the Surveyor to assure himself of the thorough efficiency of those parts of each Boiler?
 Did the Surveyor examine the Safety Valves of the Main Boiler?
 At what pressure were they afterwards adjusted under steam?
 Did the Surveyor examine the Safety Valves of Donkey Boiler?
 To what pressure were they afterwards adjusted?
 If the Survey is not complete state what arrangements have been made for its completion?

This vessel has been placed in drydock at which time the sea cocks propeller and fastenings were examined externally and found in order.

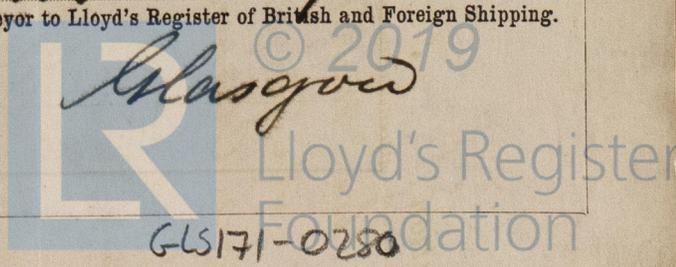

General Observations, Opinion, and Recommendation:— *As far as seen from above Survey the machinery appears to be in good order and is in my opinion eligible to remain as classed without fresh date of Survey.*
