30th April, 1915.

Dear Sirs,

With reference to the case of the new steamer "ELLAWOOD", I return herewith your First Entry report together with the approved sketch of midship section and have to request that you will complete the report in regard to the centre girder and side keelsons in way of the boiler space, and also fill in the particulars of the riveting of the butts and edges of the sheerstrake and strake below clear of the end of the bridge.

The section should also be amended to agree with the report with regard to the thickness of the forecastle side plating.

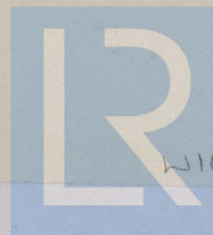

I am, Dear Sirs,

Yours faithfully,

Assistant to the Secretary.

The Surveyors,

MIDDLESBROUGH.
