S.A. John Cockerill

Hoboken, 30th May 1938.

No. 675 - Hatch trunks.

Dear Sirs,

With reference to your remark on our plan
No. 92552 regarding the cargo in the trunks of Nos. 2, 3, 4 & 5
hatches, which must be equal to 60 cubic feet per ton,
we have got in touch with our client.

The Compagnie Maritime Belge informs us as follows:-

"We regret that we cannot give you the assurance
" you ask regarding the cargo in hatch trunks.
"These, as well as the beams underneath must be strong
"enough to support any kind of cargo".

We are, Dear Sirs,

Yours faithfully,
