

Memo re S.S. "ROBERT DOLLAR" (ex German "KURLAND"), 10,893 Gross
Tons, No.81387 in the Register Book Supplement.

With reference to the date of build, viz 1917,
which appears on the copy of the Ship's Official Registry, I
have been in communication with the Registrar General of Shipping
on the subject this morning, and he confirms the date in question
stating that this was based upon the Surveyors report at the
time the vessel was surveyed by the Board of Trade Officials,
when obtaining the British Registry.

The Registrar General also confirmed 1919 as the
year when the engines were made, and 1916 for the boilers.

C. H. W.

14th June, 1921.
