

Messrs. Swan Hunter & Wigham Richardson's Nos.1561/3

It is submitted the Newcastle Surveyors' attention ~~might~~ be drawn to the length of the unsupported span of the bottom ~~and deck~~ longitudinals in way of the pump room. This compartment is 12 ft. in length and the scantlings of the longitudinals shewn on the midship section are approved for an unsupported span of only 10'-1". The Surveyors might, therefore, arrange for a sketch to be submitted shewing the proposed reinforcement for these members in way of the pump room.
