LLOYD'S REGISTER OF SHIPPING,  
17 BATTERY PLACE,

NEW YORK      June 15, 1917.

Dear Mr. Scott;

With reference to your letter of the 17th ultimo respecting the San Francisco Report No. 2477 of survey held on the steamer "REGULUS", I enclose herewith the San Francisco Surveyors' reply to my inquiry from which it will be seen that the rivets in the treble rivetted butts of shell plating are spaced  $3\frac{1}{2}$  diameters apart in accordance with the Rules-the actual measurements being  $3\frac{1}{2}$  inches in the quadruple rivetted butts and 3-1/8" in the treble rivetted butts.

The first entry reports show these measurements to have been inadvertently reversed.

Yours faithfully,

*R. P. Hutchins*

Andrew Scott, Esq.,  
LONDON.
