1917.

ANS'D

Dear Sir,

In reply to your letter of the 5th instant respecting Report No.2477 of survey held on s/s "REGULUS", I have to state that the rivets in the treble rivetted butts of shell plating are spaced $3\frac{1}{2}$ diameters apart in accordance with the Rules - the actual measurements being $3\frac{1}{2}$ inches in the quadruple rivetted butts and $3-1/8$ " in the treble rivetted butts.

In the first entry report these measurements have been inadvertently reversed and I much regret this clerical oversight.

Yours very truly,

Arnold Bennett.

The Secretary,

NEW YORK.
