23rd September, 1941.

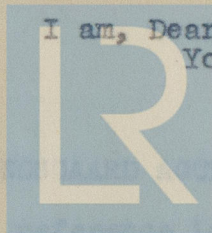

E. Dear Sir,

## "KONGSAARD"

I have to confirm your telephone conversation with this Office yesterday in regard to an enquiry whether it would be in order to run D.G. coils (M.F. & Q.) consisting of lead covered and armoured cable around the decks of the above tanker. It was understood the coils would be supplied off the vessels 220 volt D.C. power supply and run on the open deck, the joint boxes being situated in the centre castle space in a store.

As intimated over the telephone no objection will be taken to this proposal and I confirm my telegram to you today on the subject.

I am, Dear Sir,  
Yours faithfully,

Lloyd's Register  
Secretary.
