

Report No. C2.

Vauxhall Co 1899

Hull.

17th February 1908

LLOYDS REGISTER,
LONDON.
REC'D 18 FEB 1908
ANS'D

JAMES BARCLAY

attend at the works of Messrs Black and Company Hull on the 14th February 1908 for the purpose of witnessing the testing of two main steam pipes for Messrs The Vauxhall and West of England Coe No. 1899 Engines.

Hydraulic Engineer

These pipes were cut from one length of solid drawn copper, ^{pipe} flanges brazed on, and annealed and tested by hydraulic pressure to four hundred pounds per square inch and a sample piece cut from pipe, was flattened till sides met, both tests were satisfactory.

The pipes have been sent to Grimsby.
