C1505

Lloyd's Register of Shipping.

Port NEWCASTLE ON TYNE.

6th February 1934.

This is to Certify that I have
 Surveyed the Boiler and Machinery of the Steel Screw Steamer
 "ROBERTS", 2254 tons gross register, of London,
 and that I have transmitted to the Committee of Lloyd's
 Register of Shipping, London, a Report stating that all
 recommendations made by me in connection therewith have
 been carried out to my satisfaction, and that I have
 Recommended that the record of the vessel be retained in
 her present class without fresh record of survey. The slight
 breakage on the tip of one of the cast iron Propeller Blades
 made in the Register Book in the case of this vessel
 does not, in my opinion, effect the efficiency of the vessel.

Wm A. Ferguson
 Engineer Surveyor to Lloyd's Register.

This Certificate is issued upon the terms of the Rules and Regulations of the Society, which provide that:—

"While the Committee use their best endeavours to ensure that the functions of the Society are properly executed, it is to be understood that neither the Committee nor the Society are under any circumstances whatever to be held responsible for inaccuracy in any report or certificate issued by the Society or its Surveyors, or in any entry in the Register Book or other publication of the Society, or for any error of judgment, default, or negligence of the Surveyors, or other Officers or Agents of the Society."
