	SS Bal.No.1-33	
	Fitted for oil fuel	
	4,24 F.P. above 150°F.	

The Second Special Survey No.2, which became due on this vessel in October last, has been partly held and a proposal to complete this inspection in the early Summer of 1937 was agreed to by the Classing Committee.

In reply to enquiry, the Chief Surveyor for the U.S.A. and Canada has forwarded a letter from the Owners, dated 29th ultimo, stating that it is their intention to convert this vessel to a collier, and that in the more limited coastwise trade in which she will be engaged, after such conversion, they have decided not to maintain her dual classification with this Society and that of the American Bureau of Shipping. They have consequently requested the withdrawal of her class from Lloyd's Register.

The case was submitted to the American Committee on the 4th instant, when it was decided that the vessel's class should be withdrawn from the Register Book and Three Dots (. . .) inserted in lieu thereof, indicating withdrawal of class at Owners' request.

 19th August, 1937.
