

COPY.

21st., March, 1906.

Gentlemen,

I have to request that you will be good enough to state, for the information of the Committee, what arrangements are usually adopted, in the cases of oil carrying ships built in your District, for filling the oil tanks with water, and what method is adopted for controlling the valves or cocks. You will at the same time be good enough to make it quite clear whether each tank is fitted with a separate sea cock or valve.

I am, Gentlemen,

Your obedient Servant,

Secretary.

Surveyors,

NEWCASTLE-ON-TYNE.
