Reference

Dear Sir,

We are submitting under separate cover a revised plan in triplicate of hatch side coamings in way of M 3 hatchway for Messrs. Howaldtswerke M 765. It will be observed that manholes for access during construction and for subsequent conservation have now been arranged in the lower flange of the girders, instead of in the vertical web as originally proposed on the plan approved 18th June, 1937.

A compensating doubling is arranged on the girder flange to cover the openings between frs. 105 and 115, but for later access, the manholes at the ends of the girder are proposed with bolted covers.

We should be glad to be informed whether the Builders' proposals are considered satisfactory.

Dear Sir, I am,

Yours faithfully

Yours faithfully

R. B. Shepherd.

The Secretary,
LONDON.
