Reference

Dear Sir,

With reference to the plan of shifting beams for cargo hatchways in upper and tween decks for Messrs. Howaldts-werke's Yard № 765 I am forwarding to you under separate cover detail plan of the web carrier as required in your letter of the 13th instant. From this plan it can be seen that the hatch webs are to be secured by means of hinged self locking snugs fitted to the hatch web carriers. The lengths of the top angle on the hatch webs have been made to suit this locking arrangement.

In view of the fact that the material is already ordered for the hatchwebs the Builders request reconsideration of the depths of webs at hatchways Nos. 1 and 3 in the tween decks which have been amended to 550 and 460 mm respectively.

I am, Dear Sir,

Yours faithfully
for A. Chisholm

The Secretary,

LONDON
