

Plan of shifting beams for the cargo hatchways in upper and tween decks for Messrs. Howaldtswerke's No. 765 submitted, in duplicate, by the Hamburg Surveyors.

It is submitted the Surveyors be informed that the scantlings of the beams as shewn and amended on the plan of shifting beams on the upper and second decks will be approved.

The details of the arrangements at the ends of these beams is, however, not quite understood from the sketch, and the Surveyors might forward ^{the} detail plan of the web ^{carrier,} marked 2/53 on the plan, together with an explanation of the method proposed to be adopted ⁷⁶ of shipping and securing these beams.

At the same time they might draw the Builders' attention to Section 25, Paragraph 4(c) of the Rules, which requires the angles on the upper edge of the beams to extend to the extreme end of the beam in all cases.
