Re: S.S. "Zembra".  
Inspection of the boilers of the German Boiler-Inspection  
(Bremisches Amt, Bremerhaven).

Dear Sirs,

The German Boiler-Inspection of Bremerhaven  
writes us as follows:

"Enclosed we beg to return to you 6 english original tests. These certificates do not contain the specified results of tests for tensile tenacity of the plates. As example we enclose a copy of such a test, and beg you to provide these completing certificates as soon as possible.

As the Morison-furnaces of the three boilers have been replaced by Deighton-furnaces for about three years ago, we beg to send us tests (with tensile-value) of same and of the welded combustion-chamber-tubeplate too.

About the donkey-boiler we request you, to ask for the arrangements of last year, which have been promised us by the surveyor of Lloyd's Register."

We beg to send you herewith the enclosures of the above letter, and request you kindly to let us have the wanted
