

Steel Twin S.S. "MACQUARIE", No.28041 in the Register Book,
493 tons gross, built at Hull in 1909, and originally classed
A1 "With freeboard" "Australian Coasting Service,
Richmond River - Eden".

The Special Survey No.1 became due in July 1912 and the class
was omitted on the reprint of the Register Book in 1913-14.

It is submitted that copies of the original midship
section and profile plans might be forwarded to Mr.Heron
as desired, but he should be informed that in view of the age
of the vessel and of the fact that she has not been inspected
by the Society's Surveyors since she was built, special care
should be taken in carrying out the Special Survey No.3 for
reclassification, should such be requested by a new owner.

*The equipment required is stated in the
Midship Section*

MS.
21/11/22.
